SUBJECT: Conditional Approval of the Supplement to Vapor Intrusion Assessment Work Plan
(Revision 4)
CTS of Asheville, Inc. Superfund Site

Dear Mr. Wallace:

North Carolina Department of Environment and Natural Resources (NC DENR) and EPA staff have reviewed the *Supplement to Vapor Intrusion Assessment Work Plan (Revision 4)* for the CTS of Asheville, Inc. Superfund Site, which was dated June 11, 2014. As we discussed on June 12, 2014, an indoor air sample also needs to be collected inside the residence of (b)(6) be the closest home to the homes sampled in April 2014. The home does not have a crawl space so an indoor air sample is needed to make a health-based decision. The Supplement is conditionally approved with the addition of an indoor air sample at (b)(6).

EPA staff will begin contacting the property owners to obtain permission to collect samples and to schedule appointments to complete the occupancy questionnaire and for sample canister deployment/pick-up. As always, feel free to call or write if you have any questions. I can be reached at 404-562-8760 (office), 404-909-0839 (mobile) or via email at URQUHART-FOSTER.SAMANTHA@EPA.GOV.

Sincerely,

A handwritten signature in black ink, appearing to read "Samantha Urquhart-Foster", is positioned above the typed name.
